

# Copper Plumbing Fittings

COPPER AND  
COPPER ALLOY  
PLUMBING  
FITTINGS

## USAGE

Pressure and non-pressure applications including:

- Plumbing
- Gas Fittings
- Drainage

## BENEFITS

- Manufactured to Australian Standard AS3688.
- Premium quality Australian Copper.
- No risk. Manufactured by an Australian company with over 90 years experience in the plumbing industry.
- Safe. Does not burn or support combustion. Max service temp of 200°C.
- Kembla Plumbing Fittings are stocked nationwide for prompt delivery.
- Backed by MM Kembla's reputation for quality, service and customer care.

## FEATURES

- Copper capillary pressure fittings, which are marked AS3688, complement the safe working pressures of AS1432 Type B copper tubes of similar nominal diameter.
- In addition to capillary fittings, plumbers have a wide range of jointing options. Including dezincification resistant (DR) copper alloy compression and non-pressure fittings, and roll grooved fittings.
- All fittings comply with and are marked in accordance with relevant Australian Standards.
- Examples of common plumbing fittings are pictured overleaf.

## INSTALLATION

- Jointing Methods – Copper tube can be easily joined using compression or capillary fittings with either soft solders or silver brazing alloys.
- MM Kembla Fittings meet various standards applicable to Copper and Copper Alloy fittings.
- There is a full range of Capillary, high-pressure and low-pressure plumbing fittings available in various sizes.
